Dear Colleagues,

We have confirmed the dates for the fixed assets webinars (see details below). The webinars will provide an overview of the [new fixed assets project](#) and the new capital natural accounts which will improve operational controls and provide a consistent approach.

The one-hour webinars will be hosted by the Controller's Office, and subject matter experts from the fixed assets project team as well as a representative from the Budget Office to answer any budget questions. The same information will be presented each time. Please use the WebEx link below to attend the session that best suits your schedule and attend as many times as you need. A recording of the webinar will be available under resources on the [University Accounting website](#) after the three sessions have been completed.

For more information about the fixed assets project and to access available resources to support you, visit the [Rutgers University Accounting](#) website. If you have questions, please send an email to capitalassets@finance.rutgers.edu
